

# ASUG ANNUAL CONFERENCE

Orange County Convention Center  
May 5-7, 2015 | Orlando, Florida

A wide-angle photograph of the Orange County Convention Center. The building is a large, modern structure with a prominent central dome and multiple wings. The facade is primarily white with large glass windows. In the foreground, there is a paved walkway leading towards the entrance, flanked by green lawns and several tall palm trees. The sky is blue with scattered white clouds.

*Work Better Connected.*

**Taking PPM to the next Level!**  
*PG&E's Five Year PPM, MII, BPC, & HANA Journey*

**Robert Decius & Tony DeRosa**  
**Pacific Gas and Electric**  
**SESSION CODE: IU1110**

# LEARNING POINTS

- How MII and PPM support an integrated long-term planning solution
- How such a solution can impact your organization's ability to make effective capital investment decisions
- How LTP delivered value for one business unit and established the foundation for broader adoption
- How to leverage PPM and BPC to optimize your portfolio planning and selection process

# Presenter's Background

**Robert Decius**, graduated from the California Maritime Academy with an engineering degree. He started his career building equipment databases and supporting main frame work management systems for a series of fossil and geothermal power plants. Bob participated in transitioning the same systems to SAP PM in the mid-90's. He then participated in a variety of SAP work management projects for hydro, nuclear, gas / electric transmission and distribution. He is currently managing a team supporting all applications for PG&E's hydro, fossil and renewable portfolio.

**Anthony DeRosa**, President and Founder of Platinum DB EAM, PLM, BPC, BI/IP, CPM, PPM, Business Objects, Project System, Plant-Maintenance-Hosting Practice Leader. 17 years SAP experience.
