There are a limited number of complimentary registrations available, please contact us to inquire about how to secure one of the remaining seat vouchers, you will then enter the supplied voucher code when you register.

### Register here.

ASUG Pre-Conference Seminar attendees are invited to join ASUG for an after-hours party on Monday, May 15, at Cuba Libre Restaurant to kick off the conference in style.

728 W. Jackson Blvd. Suite 807 Chicago, IL 60661 info@platinumdb.com www.platinumdb.com In the context of shaping your organization's SAP road map, the volume and velocity of innovation in SAP S/4HANA, SAP ERP, and user experience (UX) may seem daunting. This has been especially true as innovation impacts the way organizations manage projects and products. Whether forming portfolios for new product introduction, investment in capital assets, or delivery of services to customers, new innovations and technologies from SAP are impacting your organization's present and future.

Join this session and learn how to make innovation seem less daunting. Hear from SAP development and SAP solution management experts, as well as product lifecycle management—focused partners to learn the latest information on the SAP applications that improve the way we plan, execute, manage, and analyze the benefits of programs and projects. Gain insight into the enhanced value of SAP applications, and see how their power has been harnessed by customers to deliver measurable results in the real-world.

#### **Agenda Overview:**

- SAP Enterprise Portfolio and Project Management road map strategic direction in the digital world
- Solution overview deep dive into SAP Enterprise Portfolio and Project Management functionality and the processes it supports
- Customer spotlight early adopters share successes and challenges
- SAP premier design partner showcase partner perspective on SAP Enterprise Portfolio and Project Management implementation and deployment

#### **Key Outcomes:**

- Identify the key functions of the SAP Enterprise Portfolio and Project Management ecosystem and gain insight into how to maximize investment in the underlying SAP applications
- See how new UX options will help you drive high adoption rates within your business and IT user community
- Plot a practical migration path to SAP S/4HANA innovations in SAP Enterprise Portfolio and Project Management
- Share in the experience of customers that have adopted the innovations in SAP Enterprise Portfolio and Project Management to help mature their organizations' project and portfolio management processes
- Understand how to implement and deploy SAP Enterprise Portfolio and Project Management based on the experiences of customers and partners
