SIMPLIFYING THE PLANNING AND EXECUTION OF CAPITAL PROJECTS

**SAP and Partner Workshop Series
CPPM for Utilities – May 5, 2014**

SAP is facilitating a series of workshops that are hosted by customers and co-presented with partners to provide thought leadership in a range of high priority topics. This event focuses on Capital Project and Portfolio Management and will be hosted by **NW Natural on May 5, 2014** at their headquarters in Portland, OR. NW Natural serves more than 686,000 homes and businesses in 107 communities in Oregon and Southwest Washington. The company buys natural gas from suppliers in the Western U.S. and Canada and distributes it to residential, commercial, and industrial customers throughout the service territory.

This meeting is the ideal way to connect with other SAP Utilities customers who are running and evaluating SAP solutions for managing capital asset investment initiatives.

Join this gathering of CPPM specialists, business-process owners and subject matter experts who are focused on maximizing the investment in SAP solutions for their organizations.

Workshop Theme – “Idea to Performance”

What will you learn? See the attached workshop outline for details.

This content-rich event will feature networking opportunities, customer case studies, industry thought leader presentations, and a live demonstration of the “art of possible” SAP solution for the end-to-end CPPM process.

There is no cost to attend, but advanced registration is required as space is limited. Reserve your place today by contacting Ian Strain at ian.strain@rossms.com or calling +1-703-447-2437.

We hope we will see you there.

Regards,

SAP Americas
