S4/HANA Commercial Project Management 2.0
with SAP Fiori, PS, MRS, PPM, BPM & SAC

Platinum DB Consulting (PDB) specializes in Project & Portfolio Management, Project System, Commercial Project Management, multi-resource scheduling, BI-Integrated Planning turnkey solutions and services in the E P P M market. Our solutions and services include innovative design, SAP and 3rd party consulting services, SAP infrastructure services, S/4 HANA in the Cloud, and Fiori development services.

We provide a unique approach that offer our clients substantial advantages. First and foremost, we provide an extensive library of pre-built SAP solutions that extend the capabilities of SAP PPM, MRS, PS, CPM, BPC, and BI-IP. All pre-built solutions were developed by PDB and go beyond the capabilities and functionality of "out-of-the-box".

Our client's engagements are supported using our Live CPM, MRS, PPM, BI-IP System and experienced consulting services. PDB can host your solution in our cloud or jump start your project in our development environment and lead the design/configuration effort all the way to supporting the application after 'Go-Live'.

How to improve your SAP Project ROI

Workshop Content:

- Demonstrate art of the possible integration with PPM, MRS, CPM, BI-IP, BPC, PS, BPM, EPC, SAC Jira, and Oracle P6
- How SAP BI-IP brings a powerful and easy to use Excel front-end to PPM, MRS, PS, and CPM. We present solutions that actually work!
- How CPM, PPM, MRS, PS, and PM is integrated in S4/HANA EPPM.
- How project forecasting can be performed in an SAP Excel-like UI or non-Excel UI
- How Fiori can be integrated with BI-integrated Planning.
- How Business Process Management can be utilized to support Best Practices and CII (Construction Institute Stage Gate).

For more workshop information Email: tderosa@platinumdb.com

Customized workshops are available.

We can deliver our workshop sessions remote for you and your team on the date of your choice. Time can be focused on topics relevant to your design.

The focus workshops are intended to provide in depth information and demonstration on key solution components in SAP CPM, PPM, MRS, PM, PS, BPM, SAC, BI-IP, and Analysis for Office. A live Platinum DB Consulting S4/HANA and ECC system will be utilized to highlight and demonstrate key functionality, features, best practices, roadmaps, and implementation recommendations.

At the end of this workshop, you will understand how CPM, PPM, BPM, PS, PM, MRS, SAC and BI-IP can work together. You will understand where to start your journey and where the highest ROI lies. You will see live examples of how the solution works using the PDB live Blueprinting systems. We will also share client implementation case studies.
